

Complete Anatomy

WEBINAR

EXPLORING COMPLETE ANATOMY

The importance of 3D models customization in the anatomy learning and teaching process.

Teaching anatomy is not one-size-fits-all. Complete Anatomy is designed to help make the educational journey, a more customizable, engaging and interactive experience.

We invite you to our upcoming webinar specifically designed for anatomy teachers and related disciplines. We will review each of the tools and features of this exclusive resource, adapted for your way of teaching:

- Explore the comprehensive female and male models, and our latest addition: the male pelvis.
- Build your anatomy curriculum with modular content.
- Use our pre-prepared courses by subject matter experts to supplement your medical teaching.
- Screenshare interactive lectures using our 3D model layering to show relationships between structures within the 12 body systems.
- Use performance monitoring to design more individualized or group learning plans.
- Prepare your students for exams with customizable quizzes specific to medicine.
